Bondhus Japan Update!

As you know, Japan was hit by a major earthquake on Friday, March 11 which resulted in a tsunami causing major damage to the country. The death toll from the tsunami may exceed 10,000 souls. Currently Japan is struggling with the possibility of a complete meltdown of several nuclear reactors and escaping radioactive particles. The human tragedy and suffering of the Japanese people is already severe; and could become worse.

As most of you know Bondhus has maintained an office/warehouse in Tokyo, Japan for over 22 years. We currently have three employees working out of the Bondhus Japan facility. The good news is that our Japanese employees and their families are safe and unharmed. Also, the Bondhus facility in Tokyo did not sustain any damage.

We will keep you informed of any serious changes in the situation.

Bondhus Expands ProHold® Socket Bit Assortment

Bondhus Corporation announces the addition of **Ball End** bits to their line of high performance socket bits. Bondhus' exclusive Protanium® steel makes each bit up to 20% stronger than competitor bits.

Bondhus socket bits use our patented ProHold® technology which allows our bit to be used in your customer's existing sockets without the need for set screws or roll pins. Instead of replacing both the bit and the socket, the customer can simply replace the bit, providing exceptional convenience and cost savings to the end user.

The addition of the **Ball End** bits allows Bondhus to offer the most complete line of hex, Star, and ball end socket bits on the market. Bondhus socket bits are available in sets and singles both with and without sockets.

High Torque Steel - Up to 20% stronger than competition

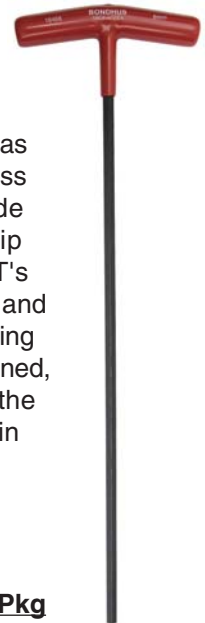

World's best corrosion protection

New POP Displays and Sales Aides Brochure

Bondhus has just finished updating and printing our POP Displays and Sales Aides Brochure. The brochure details all of our display racks and stands as well as available sales aides and banners. Remember, displays are free-of-charge when ordered with tools. Sales aides are always no charge. The item number for the brochure is #97750.

350mm Long T-Handles

Bondhus Corporation has expanded its' world class T-handle line to include 350mm straight hex tip tools. Only Bondhus T's offer strength, comfort and enhanced grip by welding an ergonomically designed, heavy duty handle to the blade, then dipping it in cushioning plastic, to reduce fatigue.

The offering includes:

Item #	Size	Qty/Pkg
16456	3mm	1
16460	4mm	1
16464	5mm	1
16468	6mm	1
16472	8mm	1
