Finally!! High Performance Socket Bits!!

Bondhus Corporation announces the introduction of a line of high performance socket bits. Each hex bit utilizes an innovative design that allows the bit to flex instead of break when high torque levels are applied. This innovative design coupled with Bondhus' exclusive Protanium® steel makes each bit up to 20% stronger than competitor bits. These bits are designed to deliver ultra high performance in even the toughest work environments. All Bondhus socket bits carry a lifetime warranty and feature Bondhus' proprietary ProGuard™ finish, which offers five times more corrosion protection when compared to competitor finishes. A full range of inch and metric tools are available.

Bondhus Corporation manufactures and distributes innovative, high quality, time saving tools for use in electronics, automotive, hobby, and machine tool industries.

For more information on other innovative tools, visit our website at **www.bondhus.com**
