Revolutionary Bits Turn Standard Socket Into Bit Holder

Bondhus Corporation announces the introduction of a line of bits that will not fall out when inserted into a six point socket. ProHold® Socket bits are half the cost of traditional socket bits because the user can utilize them with their own six point sockets. Two patented non-magnetic buttons on the sides of each bit locks it securely into the socket.

Bondhus' exclusive Protanium® steel makes each bit up to 20% stronger than competitor tools. All ProHold® Socket bits carry the Bondhus lifetime warranty and features Bondhus' proprietary ProGuard™ finish, which offers five times more corrosion protection when compared to competitor finishes. A full range of inch, metric and star tools are available.

Bondhus Corporation manufactures and distributes innovative, high quality, time saving tools for use in electronics, automotive, hobby, and machine tool industries.

For more information on other innovative tools, visit our website at **www.bondhus.com**
