### **Revolutionary ProHold® Socket Bits Now Available In Sets**

Bondhus Corporation's popular line of ProHold® Socket Bits is now available in a wide range of set combinations, offered both with and without sockets. Inch and metric bits, in two and six inch lengths, are available in a variety of sets covering sizes from 5/32" to 5/8" and 4mm to 17mm. Star set options will be available beginning in January 2010, covering sizes from T7 to T60.

ProHold® Socket bits are half the cost of traditional socket bits because the tool user can simply insert them into their existing six point sockets. Bondhus' ProHold® Socket Bits stay securely in place when pushed into a six point socket, due to two patented buttons on the socket-end of each bit. Bondhus' exclusive Protanium® steel makes each bit up to 20% stronger than competitor tools. All ProHold® Socket bits carry the Bondhus lifetime warranty and feature Bondhus' proprietary ProGuard□ finish, which offers five times more corrosion protection when compared to competitor finishes.

Bondhus Corporation manufactures and distributes innovative, high quality, time saving tools for use in electronics, automotive, hobby, and machine tool industries.

For more information on other innovative tools, visit our website at [www.bondhus.com](http://www.bondhus.com)
