### **Precision Adjustable Torque Screwdriver**

NEW FROM BONDHUS - a unique line of **FELO** brand adjustable torque limiting screwdrivers. The desired torque level is set at the top of handle. When the preset torque level is reached, the mechanism slips and makes an audible "click". Three models cover a torque range from 5.3 inch pounds to 47.8 inch pounds. The handle only limits torque when rotated clockwise. Full torque (no limiting) is achieved when the handle is rotated counterclockwise.

**FELO** is a world leader in the development and manufacturing of high quality screwdrivers. **FELO** products can be ordered from Bondhus distributors all across the USA. For a listing of stocking distributors near you, visit the Bondhus web site at **[www.bondhus.com](http://www.bondhus.com)**.

Bondhus Corporation manufactures and distributes high quality, time saving tools for use in electronics, automotive, hobby and machine tool industries.
