### **The Stubby: New Premium Hex Tool Works In Tight Spaces**

Bondhus Corporation has created a new "Stubby" line of premium quality hex tools that solve the problem of reaching screws in tight or obstructed spaces. The short arm is shorter than a standard short arm, bent with a tight radius and finished with a chamfered end to ensure easy entry into the screw head. The long arm of the tool has a ball end tip for fast insertion or extraction of screws at angles up to 25°.

Stubby hex keys eliminate the need to trim and file the short arm which could introduce burrs, soften the steel and result in stripped screw heads. The tools are made from Bondhus' exclusive Protanium® steel which makes them up to 20% stronger than competitor tools and carry the Bondhus lifetime warranty. All Stubby tools feature Bondhus' proprietary ProGuard™ finish, which offers five times more corrosion protection when compared to competitor finishes.

Bondhus Corporation manufactures and distributes high quality, time saving tools for use in electronics, automotive, hobby, and machine tool industries.

For information on other innovative tools, visit our web site at [www.bondhus.com](http://www.bondhus.com)
